

## AI GOVERNANCE PILLAR RESEARCH GRANT CALL 2023

### 1. About the AI Governance Pillar and Research Programme

- 1.1. The mission of the AI Governance pillar of AI Singapore is to ensure that AI algorithms, techniques, models, systems, and solutions are built and used in ways that benefit humanity by ensuring that AI can be and will be trusted.
- 1.2. The AI Singapore AI Governance Pillar Research Grant supports research projects on a competitive basis across Singapore-based Institutes of Higher Learning (IHLs)<sup>1</sup> and Research Institutions (RIs)<sup>2</sup>.
- 1.3. The objective of the Programme is to seed high-quality research efforts aimed at furthering our understanding of trustworthiness of AI and trust in AI such that potential for harm can be eliminated (or at least minimized) while the potential benefits to humanity can be maximized.
- 1.4. Output of the research will eventually contribute to frameworks, policies, technologies that further the mission of ensuring that AI are built and used in ways that benefit humanity. The outputs will also contribute to the other pillars of AI Singapore.
- 1.5. Research ideas at the intersection of multiple disciplines are encouraged. The theme of the proposed research programme must be motivated by an important need or problem to be solved, rather than solely curiosity-driven. AISG Governance Research Grant Call 2023 aims at funding multi-disciplinary research reflecting novel ideas/visions that are underexplored, and/or also have a clear and significant social impact.

### 2. Grant Call Themes

- 2.1. AI Singapore invites proposals in advanced research focusing on the following themes:

---

<sup>1</sup> *Institutes of Higher Learning (IHLs)*: National University of Singapore (NUS), Nanyang Technological University (NTU), Singapore Management University (SMU), Singapore University of Technology and Design (SUTD), Singapore Institute of Technology (SIT), Singapore University of Social Sciences (SUSS).

<sup>2</sup> *Research Institutions (RIs)*: A\*STAR Research Institutes and CREATE entities

i. **Theme One: Trustworthy AI - Should we trust AI?**

Transformative technology offers tremendous opportunities but raises ethical concerns and the potential for harm. We invite research that mitigates the risks of AI through promoting fairness, accountability, transparency, ethics, and safety. Governance is broadly understood to include laws, markets, networks, standards, and other tools.

ii. **Theme Two: Trust in AI - Will we trust AI?**

Utilisation of AI will be enhanced by faith that the end-to-end process is robust and accountable. We invite interdisciplinary research into understanding the factors that shape perceptions of human-machine interaction, influencing the adoption of beneficial AI.

2.2. Research Areas:

- i. Proposed research areas include (but are not limited to) those outlined on the AISG website [here \(scroll down to the AI Governance section\)](#).
- ii. AI Singapore is particularly interested in seeing proposals that bring non-traditional perspectives to bear on questions of AI Governance, for example from the humanities and social sciences. This might include perspectives from anthropology, communications, economics (including behavioural economics), education, law, neuroscience, philosophy, political science, psychology, sociology, among other fields. Technical proposals are also welcome, but those with an interdisciplinary focus are more likely to be supported.
- iii. For this call, AI Singapore is particularly (but not exclusively) interested in proposals that address the following focus areas:

- **Generative AI: Combatting Supercharged Disinformation**

“A lie can travel halfway around the world, while the truth is still putting on its shoes”. Combating disinformation has become even more challenging as it becomes supercharged by generative AI. For example, generative AI may reduce the cost of producing personalised and compelling disinformation at scale, as opposed to current approaches that count on a small amount of content to go viral. Its ability to generate even more

Hosted by

realistic “deepfakes” and impersonate human speech and writing styles also makes it more difficult to detect disinformation. To protect our online spaces, we need a deeper understanding of how the nature of disinformation would evolve with generative AI and how it would impact society. We also need to consider innovative and out-of-the-box solutions to be able to counter the spread of super-charged disinformation. Some key questions include:

- a. What is the scale and texture of potential harms from automated generation of (i) misinformation (ii) deepfakes and (iii) malware at scale in a way that generative AI is ideally suited for?
- b. What are the safeguards to mitigate risks while allowing innovation?
- c. Does labelling AI-generated content make a difference to outcomes in terms of risk mitigation? How should this be done to maximise impact?

- **Fairness: Defining Ethics for AI Governance Testing**

The development of objective evaluation methods for AI is challenging as there are many subjective factors involved in assessing the quality of AI-generated content. Abstract ethical concepts like fairness requires consideration of the social and cultural context in which the AI is being used. Furthermore, ethical values can be contested or evolving (e.g. abortion). Evaluation methods need to be able to adapt to such shifts in societal values, and address instances where there is no consensus on what constitutes a universal “good”. We invite researchers to investigate the challenges of evaluating the quality of AI and develop reliable and effective evaluation methods. Some key questions include:

- a. How do we define fairness – algorithmic fairness versus public perception of what is fair?
- b. How do we bridge the gap (both ways) so that people will responsibly trust AI and know how to assess it critically?
- c. How do we factor ethical considerations, spanning universal truths (e.g. racism) to contested and evolving values (e.g. abortion), dynamically into responsible AI testing tools to govern AI models effectively?

Hosted by

- **ChatGPT in Education and Skills Development: Support or Crutch?**

Given that ChatGPT can be a supportive tool or a crutch, educators need to be very thoughtful about how the technology is used to enhance learning (e.g. used by students as an information gathering tool so that they can focus on higher-end skills like creativity), while putting in place guardrails to minimise mis-use by students (e.g. over-reliance on ChatGPT/ plagiarism compromises development of critical thinking and problem solving skills).

At the workplace, employers also need to consider how generative AI would impact workflows, potential risks of deskilling, and the need to upskill their workers to fully realise the productivity gains. For instance, with Codex taking care of routine coding, tech companies would need to redefine the job scope/requirements of a coder that will focus on more creative and innovative tasks, and ensure that essential coding skillsets would not be eroded by the adoption of Codex. To understand how ChatGPT and generative AI tools can best be used to enhance education and skills development, some key questions include:

- a. How should the education sector use ChatGPT and other generative AI tools to ensure that they support education objectives (e.g. supplement and enhance learning), and not cripple them in the long term (e.g. removing the need for critical thinking/de-skilling)?
- b. What are the new dynamics and risks to skills development when AI is integrated into work? How do we measure its impact on skills development and proficiency?
- c. How should governments/companies approach the adoption of generative AI as a workforce productivity tool without leading to loss of essential skills in the long term?

2.3. Proposals are encouraged to build on existing work in this broad area but bring a regional focus to bear. This might include examining the impact of different histories/cultures/social institutions on the broad questions of AI governance.

2.4. All proposals should focus on a specific question and have a clear research focus.

2.5. Proposals should be specific about how they relate to AI or to specific AI technologies, rather than technology in general.

**AI Singapore**

innovation 4.0, 3 Research Link #05-05 Singapore 117602 | [www.aisingapore.org](http://www.aisingapore.org)

AI Singapore is a national programme supported by the National Research Foundation and hosted by the National University of Singapore (Company Registration No: 200604346E)

2.6. Proposals should include clear descriptions of the industry or policy implications of the proposed research.

### 3. Funding Support

3.1. The Programme will support each project for a duration of up to 3 years. Funding for each proposal will be capped at a maximum of S\$ 300,000 for single Principal Investigator (PI) projects and S\$ 800,000 for multi-PI/discipline/institution projects (inclusive of 30% IRC).

	<b>Funding (inclusive of 30% IRC)</b>	<b>Category</b>
Tier 1	\$ 300,000	Single PI
Tier 2	\$ 800,000	Multiple PI Inter-Disciplinary Inter-Institutional

3.2. The proposal should be based on a realistic budget with appropriate justifications that correspond to the scope of work to be accomplished. The total cost of each project includes all approved direct costs<sup>3</sup> and indirect research costs/overheads<sup>4</sup>. All expenditure budgeted should be inclusive of any applicable Goods and Services Taxes (GST) at the prevailing rates.

3.3. Please refer to **Annex A – Guidelines for the Management of Research Grants (AI Singapore)** (external attachment) under AI Singapore Programme, including the list of “Non-fundable Direct Costs”.

3.4. For all direct cost items proposed for the project, please note that:

- i. Host Institutions must strictly comply with their own procurement practices;

<sup>3</sup> Direct costs are defined as the incremental cost required to execute the project. This excludes in-kind contributions, existing equipment and the cost of existing manpower as well as building cost. Supportable direct costs can be classified into expenditure on manpower (EOM), expenditure on equipment (EQP), other operating expenses (OOE), overseas travel (OT) and research scholarship (RS).

<sup>4</sup> Indirect costs are expenses incurred by the research activity in the form of space, support personnel, administrative and facilities expenses, depending on the host institution’s prevailing policy. Host institutions will be responsible for administering and managing the support provided by AI Singapore for the indirect costs of research. This will not be applicable to research scholarship.

- ii. Host Institutions must ensure that all cost items are reasonable and are incurred under formally established, consistently applied policies and prevailing practices of the host institution; and
- iii. All items/services/manpower purchased/engaged must be necessary for the R&D work.

3.5. PIs/Co-PIs/host institutions shall use reasonable efforts to employ or otherwise engage Singapore citizens and/or Singapore Permanent Residents to be deployed in the work under the project.

## 4. Eligibility Criteria

4.1. At the point of application, PI must fulfil the following requirements:

- i. Hold a full-time appointment<sup>5</sup> in a Singapore-based Institute of Higher Learning (IHL) or Research Institution (RI); and
- ii. A track record of leadership ability in coordinating research programmes and providing mentorships to research team, as well as having productive research outcomes.

4.2. At the point of application, Co-PIs must fulfil the following requirements:

- i. Hold a full-time appointment in a Singapore-based Institute of Higher Learning (IHL) or Research Institution (RI).

4.3. Researchers from Medical Institutions<sup>6</sup>, AI Start-ups in Singapore, private sector and other entities are eligible to apply as Collaborators.

4.4. Only research conducted in Singapore may be funded under the Programme. Please refer to **Annex C – AI Singapore Research Programme Terms and Conditions** (external attachment).

<sup>5</sup> Defined as at least 9 months of service a year based in Singapore or 75% appointment.

<sup>6</sup> Researchers from Medical Institutions in Singapore who hold at least 25% joint appointment in a Singapore-based Institute of Higher Learning (IHLs) and/or Research Institution (RI) may apply as PI or Co-PI. If awarded, the grant will be hosted in the IHL/RI.

## 5. Selection Process and Evaluation Criteria

5.1. Proposals are selected and evaluated based on:

- i. **Scientific Quality** as conveyed through the proposal’s framing of the challenge to be addressed, current state-of-the-art methods, and the new approach proposed etc.
- ii. **Novelty of research directions** that challenge current understanding or provides pathways to new frontiers.
- iii. **Feasibility / Viability / Appropriateness.** Can the proposal’s objectives be reasonably achieved through the plan described?
- iv. **Suitability and track record of PI and research team.**
- v. **Impact to the field of AI.** This could be demonstrated in terms of the conferences and journals the research team intends to publish, intellectual property produced, technologies deployed, manpower trained/spun off to industry and overall value-add to target groups.
- vi. **Resources Requested** and their suitability/appropriateness for the planned research.

5.2. Proposals will be assessed by the AI Governance Pillar Scientific Committee and AI Singapore.

5.3. **Inter-disciplinary and/or inter-institutional proposals** will be favourably considered.

5.4. All decisions are **final** and no appeals will be entertained.

## 6. Grant Call Timeline

6.1. The schedule for the AI Governance Research Grant Call 2023 is as follows:

Event	Dates
Announcement of the Grant Call	12 April 2023
Opening date for <u>softcopy</u> submission (via portal)	12 May 2023
Closing date for <u>endorsed</u> proposal submission (via portal)	30 June 2023
Evaluation and selection of proposals	July – November 2023
Release of outcome and award	November 2023
Project commencement	1 January 2024

## 7. Application / Contact

- 7.1. The AI Governance Research Application Portal for full proposal submission is available from 12 May 2023 on <https://governancegms.aisingapore.org/>, alternatively, it is also accessible through <https://aisingapore.org/governance/grant-call/>.
- 7.2. All applications are required to be submitted through the Application Portal. Email submissions will not be accepted unless exception is granted by AI Singapore.
- 7.3. Interested applicants should submit the AI Governance Research application form with all the sections duly filled by the stipulated deadline in two formats:
  - i. Input values through the portal fields, and;
  - ii. AI Singapore Application Form (PDF) and Annexes (PDF) in ZIP form
- 7.4. Only complete applications with the endorsement of the relevant institutional authority / director of research (or equivalent), will be accepted by AI Singapore.
- 7.5. There is no quota imposed for institutions or principal investigators. In other words, each institution may submit multiple proposals and each principal investigator may also submit multiple proposals.
- 7.6. Late submissions or submissions from individual applicants without endorsement from the relevant institutional authority / director of research (or equivalent) (by the deadline stipulated above) will not be entertained.
- 7.7. For more information, please contact [governance@aisingapore.org](mailto:governance@aisingapore.org).

## 8. Instructions to Applicants & Host Institution

- 8.1. Please note that **respective institution's application deadline may differ** from AI Singapore's portal deadline.
- 8.2. PI and Co-PIs are required to provide their Google Scholar profile in the application form (not mandatory for Collaborators) and are expected to commit a proportionate amount of their time in ensuring the success of the project (at least 20% of the total time for PI and at least 10% for Co-PIs).

### AI Singapore

innovation 4.0, 3 Research Link #05-05 Singapore 117602 | [www.aisingapore.org](http://www.aisingapore.org)

AI Singapore is a national programme supported by the National Research Foundation and hosted by the National University of Singapore (Company Registration No: 200604346E)

8.3. Please note the following instructions on specific information to be provided in the relevant sections of the application form:

8.3.1. Section 1 - Cover Sheet

This section should clearly state the time commitment of each team member (PI/Co-PIs and Collaborators). All PIs and Co-PIs must provide their Google Scholar profile.

8.3.2. Section 2 – Details of Research Proposal

A full proposal with **a limit of 10 pages** (including Executive Summary) in size 11-point Arial font with full justified margins, single-line spacing. **Applications failed to follow the prescribed format may be rejected without a review.**

The case for support should include the following sections and information specified in the following table:

Sections Required	Information to be Provided
Executive Summary	Maximum of 500 words summarizing the project proposed, written for the understanding of individuals not trained in the scientific field. This summary should be written in relatively simple and non-technical language.
Research Objectives	This section should articulate clearly the use-inspired objectives and expected outcomes of the project.
Proposed Approach, Project Plan, Role of Team Members	<ul style="list-style-type: none"> <li>• Details should be provided on the scientific challenges to be addressed and the proposed methodology/approach to solving these challenges.</li> <li>• PI/Co-PIs should highlight in this section the importance of the problems being addressed, how their work would create new knowledge or advance existing understanding, the novelty of their proposed approach and the potential for this to produce breakthrough work.</li> <li>• PI/Co-PIs should be specific about how the proposed research relates to AI or specific AI technologies, rather than technology in general.</li> <li>• Explanation on the financial and human resources required to accomplish the objectives, the project schedule and the mitigation of risks should be included.</li> <li>• The PI, Co-PIs and other team members should also be identified in this section, highlighting any competitive advantages of individual</li> </ul>

Sections Required	Information to be Provided
	<p>members in terms of unique capabilities and/or experience relevant to the project's focus.</p> <ul style="list-style-type: none"> <li>This section should also be used to highlight the international competitiveness of the work being carried out in terms of merit with mentions of existing work being carried out by other teams around the world.</li> </ul>
<p>Outcomes and Deliverables</p>	<ul style="list-style-type: none"> <li>A summary of the deliverables and outcomes for the project should be provided in this section. KPIs proposed should be linked to the objectives of the project and should be as quantitative as possible (e.g.: a 2X improvement, or a specific achievement) – as a means to track/measure the success of the project at mid-term and at completion.</li> <li>PIs should discuss implications of the proposed research for industry or policy.</li> <li>PIs should also use this section to highlight important potential/possible future outcomes from the successful execution of the project.</li> <li>The detailed listing of KPIs should be provided in Section 5 of the application form.</li> </ul>
<p>Ethics Statement</p>	<p><i>(Maximum 1 page, excluded from the 10-page limit. The description should not contain information that should otherwise be in the main proposal)</i></p> <ul style="list-style-type: none"> <li>This section should include statement of the potential negative ethical/societal impacts of the proposed research. Submissions should also provide description on how these risks can be mitigated, if identified.</li> </ul>

### 8.3.3. Section 3 – Proposed Budget

PIs should fill in the detailed budget breakdown in this section of the form, broken down into the categories and sub-categories, mainly:

- i. Expenditure of Manpower (EOM);
- ii. Expenditure on New Equipment (EQP);
- iii. Other Operating Expenses (OOE), with sub-categories for local conferences/ working visits/ meetings, materials and consumables, virtual conferences, and miscellaneous costs or others; and
- iv. Overseas Travel (OT), including overseas physical conferences/ working visits/ meetings.

- v. Research Scholarships (RS). Note: RS category is not eligible for indirect costs.
- vi. Any additional information (e.g., equipment quotations, OOE details, etc.) should be provided as separate attachments. Further line item breakdown is required in sub-section of the application form (3.2: Detailed Breakdown & Justifications). Only details for the amount of funding sought under AI Singapore should be provided in this section; other sources of funding for the project should be indicated separately and clearly in the “Other Funding Support” section for AI Singapore’s information. Please refer to **Annex A – Guidelines for the Management of Research Grants (AI Singapore) (external attachment)** for the list of direct cost items (non-exhaustive) that are non-fundable under AI Singapore.

#### 8.3.4. Section 4 – Declaration of Other Funding Support

Details of all grants currently held or being applied for by the PI and Co-PIs listed on the cover page, in related areas of work, must be declared in this section.

Failure to do so will be considered a breach of the undertaking required by all PI and Co-PIs in Section 7 of the application form and may render the application invalid. Please refer to **Annex C – Declaration of Other Funding Support Supplementary in the application form** for reference.

#### 8.3.5. Section 5 – Performance Indicators

PIs should provide full details of the KPIs for their project.

#### 8.3.6. Section 6 – Names of Suggested International Reviewers

#### 8.3.7. Section 7 – Declaration by Grant Applicants

#### 8.3.8. Section 8 - Endorsement by the Host Institution

#### 8.3.9. Annex A – Project Implementation Schedule

PIs should provide full details of the project implementation schedule.

#### 8.3.10. Annex B – Curriculum Vitae

2-page CVs of all PI, all Co-PIs and Collaborators listed on the cover page must be

provided according to the format provided.

#### 8.3.11. Annex C – Declaration of Other Funding Support Supplementary

PIs should provide details of other funding support.

- 8.4. Proposals submitted should contain all relevant information required for a proper and complete evaluation of their merits without the need to go back to applicants for additional information. Relevant privileged or confidential information should be disclosed if necessary to help convey a better understanding of the proposed project. However, such information should be clearly marked in the proposal.
- 8.5. Appendices should contain supporting diagrams, references and Gantt chart to illustrate the points mentioned in Section 2. However, **elaboration of proposals' contents within appendices will not be reviewed.**
- 8.6. A complete set of signatures may be provided using multiple copies of Section 7 (the undertaking section) of the application form. The softcopy submission will be taken as the final and complete version of the proposal.
- 8.7. Submissions which are incomplete (e.g., missing Google Scholar profile, missing host institution endorsement) or not received by the close of the relevant call will not be considered.
- 8.8. Research support office from the IHLs and/or Research Institutions are required to ensure that information submitted by their researchers complies with the requirements outlined in the application guideline. **The following will be rejected without review:**
- i. Missing or wrong version of application form.
  - ii. Inappropriate format (e.g., small font size and tight para spacing) or incomplete applications (e.g., sections left blank, missing CVs, etc.).
  - iii. Late submission.
  - iv. Revisions, made after closing date.
  - v. Proposal not within theme/scope
  - vi. Duplicates of proposal submitted to any other public funding agencies for simultaneous consideration.
  - vii. Ineligibility of PI and/or Co-PIs.

Hosted by

- 8.9. PI and Co-PIs should note that **parallel submissions are not allowed** – i.e. applicants **must never send** similar versions or part(s) of the current proposal application to other agencies or grants for funding (or vice versa).
- 8.10. The budget for the research proposal should be prepared according to the guidelines stipulated by the AI Singapore Research Programme and the applicant's host institution/research institute.
- 8.11. **General Ethical Conduct.** Researchers and research institutions should recognise that they have an ethical obligation to weigh societal benefits against risks inherent in their work. All research must be conducted responsibly and honestly. Please refer to own institution's guidelines on ethical conduct/research integrity.

## 9. Terms & Conditions of Award

- 9.1. Funding from AI Singapore will be awarded to and managed by the Host Institution of the PI and/or Co-PI. No part of AI Singapore funding will be awarded to Collaborator(s).
- 9.2. AI Singapore will disburse funds on a reimbursement basis. Host institutions shall submit requisitions for direct and/or indirect costs for which the funding is permitted to be used to **AI Singapore on a half-yearly basis** using the forms provided. Requisitions shall include detailed schedules of expenditure incurred for the previous period, as certified by its chief financial officer or an authorised nominee.
- 9.3. No funds shall be disbursed for approved projects unless:
- The relevant research collaboration agreements (where applicable) have been signed.
  - The respective research compliance approvals (where applicable) have been obtained from the appropriate board/office.
- 9.4. The Host Institution is required to submit to AI Singapore a **Yearly Progress Report** within (1) month from the end of each relevant Financial Year (by 30 April). The Host Institution is also required to provide details on **Top 5 works of impact** from the individual projects (Top 3 for first year of project funding) – **including supplementary presentation slides** – as part of the yearly progress reporting. For each work, give (a) title, (b) full citation details, (c) description of significance/impact.

Hosted by

- 9.5. AI Singapore shall, as the grantor, **have the right to request for additional project review materials** from the Host Institution. The Host Institution shall submit further information as requested by AI Singapore, if the project review materials are deemed inadequate or unsatisfactory. AI Singapore shall also **have the right to request for the PI and/or Co-PI to present on their project's progress and impact** at respective meetings as specified by AI Singapore or its grantors.
- 9.6. The detailed terms and conditions applicable to the grant will be attached during the award.

Hosted by

## **ANNEX A: GUIDELINES FOR THE MANAGEMENT OF RESEARCH GRANTS (AI SINGAPORE)**

## **ANNEX B: INSTRUCTIONS TO INSTITUTION'S APPOINTED AUDITOR ON FINANCIAL AUDIT (GOVERNANCE)**

## **ANNEX C: AI SINGAPORE AI GOVERNANCE RESEARCH TERMS AND CONDITION**
